

IN THE CLAIMS:

Please cancel Claims 1 to 19 without prejudice or disclaimer of subject matter. The claims, as pending in the subject application, now read as follows:

20. (Original) An image processing method for performing a conversion processing of image data, comprising:

an input process of inputting image data;  
an enlargement/reduction magnification setting process of setting an enlargement/reduction magnification of the image data inputted by said input process;  
a data converting process having a plurality of image data conversion tables and using one selected conversion table to convert said inputted image data to output data;  
and

a table selecting process of selecting said conversion table in accordance with the enlargement/reduction magnification set by said enlargement/reduction magnification setting process.

21. (Original) An image processing method, comprising:

an input process of inputting image data;  
an enlargement/reduction magnification setting process of setting an enlargement/reduction magnification of the image data inputted by said input process;  
a table calculating process for calculating a conversion table for converting input image data to output image data; and

a data converting process for using the conversion table calculated by said calculating process to convert said inputted image data to output data, wherein said table calculating process comprises calculating said conversion table in accordance with the enlargement/reduction magnification set by said enlargement/reduction magnification setting process.
